Polyethylene (Plastic) Film

A single layer of polyethylene (plastic) film provides protection at an affordable cost.

Coated Polypropylene ("Poly-coated")

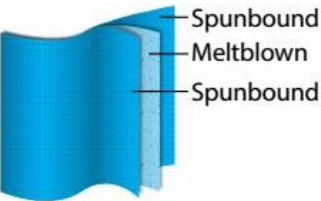

Soft, spunbond polypropylene is coated with a layer of polyethylene (plastic) film.

SMS Material

Balanced mix of protection and comfort

Strong and breathable, Spunbond/Meltblown/Spunbond (SMS) is a multi-layer fabric composed of inner layers of meltblown polypropylene between outer layers of spunbond polypropylene that is ideal for extended wear. Light/medium weight SMS is appropriate for low amounts of fluid and heavy weight SMS may be appropriate for moderate contact with fluids.

SSMS Material

SSMMS (3 beams of Spunbond and 2 beams of Meltblown) or simply SMS by Global Nonwovens is a 5 layered 100% Polypropylene nonwoven fabric manufactured using 5 beams. This fabric offers amazing benefits like fine filtration, low pressure drop, acoustic insulation and decent strength and elongation. SSMMS fabric is widely used in the hygiene industry to make disposable diapers, feminine care products, Gowns, Coveralls, Masks and Hospital Disposables etc.
